2012-2013 FULL LINE CATALOG

OTTER PRO SLEDS

Unlike other plastic molding processes like thermoforming & blow-molding, which are commonly used in manufacturing children's sleds, roto-molding results in a much more durable sled with seamless surfaces and uniform wall thickness. Our process also distributes more material in the corners, to absorb shock & stresses where they occur most. Since the material isn't stressed during production the finished product is stronger, more reliable and less susceptible to cracking in extreme conditions.

100 % Roto-Molded Tough One-Piece Polyethylene Construction

Reinforced Outer Lip For Strength; Also Results in Remarkable Wall Strength

Uniform Thickness

Raised Back For Cargo Security

Optimum Attack Angle For Conquering Snow, Slush and Challenging Terrain

OTTER PRO SLEDS are designed for high mileage use in extreme conditions!

Molded-In Ribs with Hyfax Pockets. Shown with Optional Hyfax Runners. See Page 16.

Thick, Ultra-Rugged Bottom

Molded-In Hitch Pockets for attaching Optional Otter Sled Tow Hitch. See Page 15.

*Dimensions and Weights are Approximate & May Vary Slightly

OTTER WILD SLEDS

The Otter Wild Sleds are a purpose built variation on our premier PRO design. Holding the same footprint and attack angle, we raised the front and rear of the sled for cargo containment, while lowering the sidewalls for easier access to gear. The lower sidewalls also allow the ability to tie-down loads at a lower anchoring point.

Raised Back For
Cargo Security

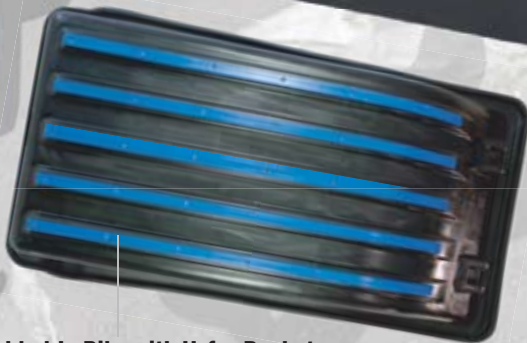

Reinforced Outer Lip For Strength;
Results in Remarkable Side Wall Strength

100 % Roto-Molded Tough One-Piece
Polyethylene Construction

Shown with Optional Hyfax Runners.
See Page 16.

OTTER SPORT SLEDS

OTTER SPORT SLEDS are built to be a lighter weight version of our Otter Pro & Otter Wild Sleds. Otter Sport Sleds are best suited for hand pulling (includes a tow rope), and are the perfect tool for that early season ice, game hauling, or other duties such as yard work, etc.
